PREFACE

The Operations and Statistical Analysis Section of Management Services, Texas Department of Corrections, presents the eighth consecutive Fiscal Year Statistical Report. The report presents a statistical description of the demographic information on inmates who were admitted to, confined in, and released from the Texas Department of Corrections during Fiscal Year 1984 (September 1, 1983 through August 31, 1984).

The Texas Department of Corrections Electronic Data Processing Division was the primary source of data for this document. Other sources within the Texas Department of Corrections were the Windham School System, the Division of Continuing Education, and the State Funds Department of the Finance Division. Additional data were provided by the Texas Department of Water Resources.

The report provides management with information that assists in the effective and efficient operation of the Department. It also serves as a resource document for criminal justice research and provides information to the public.

1984 FISCAL YEAR STATISTICAL REPORT

INTRODUCTION

The information in this document is primarily descriptive and self-explanatory. The following definitions and narrative will facilitate the reader's understanding of the Fiscal Year Statistical Report.

DEFINITIONS

Inmates Admitted: The admissions section represents actual persons received by the Department under new commitments; it excludes admission transactions involving parole violators, mandatory supervision violators, conditional pardon violators, shock probation violators, and "paperwork only." This section contains two actual receives categories: admissions and admissions voluntarily surrendered.

Inmates Discharged: The inmates discharged section represents actual persons discharged by the Department; it excludes all "paperwork only" discharges. This category contains three actual discharge categories: discharges, expiration of sentence; discharges, hold for detainer; and discharges, court order.

Inmates Paroled: The inmates paroled section represents actual persons paroled from the Department; all "paperwork only" paroles are excluded. Three categories are represented: parole; parole, hold; and parole, reinstatement.

Inmates On Hand: The inmates on hand section represents actual persons physically present at the end of any stated workday. For the purpose of this report, on-hand categories are effective as of August 31, 1984.

SMSA: The SMSA is a standard metropolitan statistical area generally composed of a central city with a population of 50,000 or more inhabitants and the surrounding county or counties which share certain metropolitan characteristics.

Mandatory Supervision Discharged: This section includes only those felons whose offenses occurred on or after August 29, 1977; this is the effective date of an amendment to Article 42.12 of the Texas Code of Criminal Procedure to include mandatory supervision of all dischargees of the Texas Department of Corrections. Before the amendment only parolees were under supervision after leaving the prison. The period of mandatory supervision is equivalent to the maximum sentence length less calendar time actually served on the sentence.

Parole Violators: This section includes all inmates who were returned to the Texas Department of Corrections as a result of violating the conditions of their parole.

Mandatory Supervision Violators: This section includes all inmates who were returned to the Texas Department of Corrections as a result of violating the conditions of their release under Mandatory Supervision.

Shock Probation: This type of sentencing and discharging was introduced by the 65th Texas Legislature. It granted authority to the judges to sentence offenders to the Texas Department of Corrections for a period of no more than 120 days and no less than 60 days. Only first offenders who are sentenced to 10 years or less and who committed crimes other than robbery, homicide, or rape are affected by this law (ART. 42.12, Sec. 3e). After release from TDC, they are supervised by a probation officer. Violators of Shock Probation may be returned to the Texas Department of Corrections.

POPULATION TRENDS AND CHARACTERISTICS

On August 31, 1984, the inmate population was 35,772. One year earlier it was 36,769, a decrease of 2.71 percent.

The decrease in population during the 1984 fiscal year can be partially explained by the following facts concerning inmate population flow:

1. Admissions - During the 1984 fiscal year there were 16,773 inmates admitted to the Texas Department of Corrections with new sentences, a decrease of 6.72 percent from the 17,981 inmates admitted during the 1983 fiscal year.

2. Discharge - There was a decrease of 13.92 percent in the number of inmates discharged in fiscal year 1984 compared to fiscal year 1983. This translates into 278 fewer inmates discharged in 1984; there were 1,997 discharged in 1983 and 1,719 discharged in 1984. The increase in discharges during 1983 was primarily the result of Senate Bill 640 which granted additional and retroactive good conduct time credit to inmates. The pool of inmates available for release under discharge will continue to decrease because of the mandatory supervision law.

3. Mandatory Supervision - The number of inmates released under mandatory supervision during the 1984 fiscal year was 10,055. This was an increase of 30.33 percent above the 7,715 inmates released under mandatory supervision during the previous year. This increase was due in part to the application of early release provisions within the mandatory supervision law. As of August 31, 1984, 28,061 inmates (78.44 percent of the on-hand inmate population) had been admitted with new convictions since the mandatory supervision law became effective August 29, 1977. This compares to 26,370 inmates (71.72 percent of the on-hand inmate population) as of August 31, 1983.

4. Parole - During the 1984 fiscal year there were 9,989 inmates who were released on parole. This was an increase of 1,401 inmates or (16.31 percent) from the 1983 fiscal year when 8,588 inmates were paroled. The increase is attributed to Senate Bill 640 and the special effort of the Board of Pardons and Parole to increase the number of releases by parole and by early mandatory supervision.

5. Shock Probation - During fiscal year 1984, 1,723 inmates were released on shock probation, 123 fewer inmates than during 1983, a decrease of 6.66 percent.

6. Mandatory Supervision Violators - The number of inmates returned to the Texas Department of Corrections as mandatory supervision violators increased from 1,416 during fiscal year 1983 to 2,278 during fiscal year 1984, a 60.88 percent increase.

7. Parole Violators - During fiscal year 1984 the number of parole violators returned to the Texas Department of Corrections increased to 3,266 from the 2,857 parole violators returned in fiscal year 1983. This was an increase of 14.32 percent.

8. Shock Probation Violators - There were 616 inmates returned to the Texas Department of Corrections as shock probation violators during fiscal year 1983. During the 1984 fiscal year, 741 inmates were returned as shock probation violators, an increase of 20.29 percent.

SUMMARY

Analysis of the population flow for fiscal year 1984 reveals an increase of less than one percent in the total number of inmates admitted (new receives, parole violators, mandatory supervision violators, and shock probation violators). However, during this time period the number of inmates released (parole, mandatory supervision, discharge, and shock probation) increased by 16.58 percent. The increase in the number of inmates released was primarily a result of special efforts to reduce the inmate population.

The ethnic composition of those inmates who were incarcerated in TDC during the 1984 fiscal year was very similar to that of the 1983 fiscal year as well as those of previous years. For the on-hand inmate population as of August 31, 1984, the ethnic composition was as follows: Blacks, 43.13 percent; Caucasians, 37.44 percent; and Hispanics, 19.41 percent. On August 31, 1983, the composition was: as follows: Blacks, 43.65 percent; Caucasians, 37.49 percent; and Hispanics, 18.85 percent. The similarity of ethnic composition between the two years remained consistent for inmates admitted, discharged, paroled, and released under mandatory supervision.

There were no significant changes in the mean I.Q. scores for fiscal year 1984 compared to fiscal year 1983. The mean I.Q. score for the inmates on-hand during fiscal year 1984 was 87.66, in 1983 it was 86.75.

There were no significant changes in the mean sentence length for the inmates on-hand. During fiscal year 1983, the mean sentence length was 20.33 years; in fiscal year 1984, it was 20.56 years.

The mean age of 30.07 years in fiscal year 1984 was not significantly different from the mean age of 29.88 years in fiscal year 1983.

The distribution of offenses committed by inmates incarcerated during the 1984 fiscal year was in all categories of on-hand, discharges, paroles and admitted, very similar to that of the 1983 fiscal year. The crimes for which the majority of TDC inmates were incarcerated were in rank order: burglary, robbery, and homicide.

CONCLUSION

In summary, the population characteristics of those inmates who were incarcerated in TDC during the 1984 fiscal year showed no conspicuous differences from those of 1983 and previous years.

This document is a descriptive presentation of the demographic characteristics of the inmate population. Therefore, the reader should avoid the inference of cause-effect relationships from the described data.

*Data on IQ of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on IQ of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on IQ of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on IQ of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-01-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on IQ of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on I.Q. of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on I.Q. of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on IQ of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored 70 or less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.

*Data on IQ of inmates who entered TDC after 10-28-78 based upon Revised Beta II System of Classification. Prior to 10-28-78 the Revised Beta Test was utilized. Beginning 2-1-84 all inmates who scored 70 or less on the Revised Beta II I.Q. test were administered the Culture Fair I.Q. test. Those inmates who scored less on the Culture Fair I.Q. test were administered the Wechsler Adult Intelligence Scale-Revised I.Q. test.
